WORK EXPERIENCE

InnoLab Co., Ltd. | Bangkok, Thailand

Senior Software Engineer | Feb 2023 – Present

- Managed day-to-day engineering activities and provided technical guidance to the dev team.
- Developed and maintained healthcare software used for med workflows and lab data processing.
- Designed system architecture and improved existing solutions to support reliability, scalability, and future development.
- Integrated laboratory result APIs and other medical data services with internal platforms.
- Planned technical tasks, distributed work across the team, and followed up on delivery progress.
- Reviewed code and maintained development standards for code quality, security, and maintainability.
- Helped team members troubleshoot complex application, integration, and production issues.
- Coordinated with support teams to investigate customer-reported issues and determine appropriate technical solutions.
- Improved application performance, stability, and the accuracy of medical and laboratory data.
- Ensured sensitive healthcare data was handled according to internal security and privacy requirements.

Cloudstaff, Inc. | Manila, Philippines
Senior Technical Business Analyst | Jun 2018 – Dec 2022

- Managed the technical requirements pipeline for a financial trading platform and worked directly with Product Owners and engineering teams.
- Translated complex trading workflows into user stories, functional specifications, technical requirements, and acceptance criteria.
- Facilitated backlog refinement and sprint prioritization to keep development scope realistic and aligned with delivery timelines.
- Coordinated UAT, defect analysis, and production issue investigation with QA and engineering teams.
- Supported release planning and helped resolve requirement gaps that could affect production delivery.

Hotel Quickly App Co., Ltd. | Bangkok, Thailand
Software Engineer | Aug 2017 – Mar 2018

- Developed and maintained hotel booking features using PHP and JavaScript.
- Integrated third-party APIs to improve booking availability, data accuracy, and transaction reliability.
- Translated product requirements into technical specifications and production-ready features.
- Investigated application issues and supported fixes for booking and integration workflows.

United Nations Operation | Reykjavík, Iceland
ICT Support Specialist | May 2016 – Jun 2017

- Automated data backup procedures using Linux shell scripting, reducing manual administrative work.
- Managed and maintained secure LAN, Wi-Fi, server, and internal web portal environments.
- Provided technical support for systems used by international diplomatic staff.
- Investigated hardware, software, network, and user-access issues.

Tourism Authority of Thailand | Bangkok, Thailand
Web Developer | Jan 2015 – Mar 2016

- Developed and maintained websites and web-based content for tourism-related services.
- Conducted technical SEO audits and resolved crawling, indexing, and redirect issues.
- Optimized frontend assets and server response times to improve page load speed and user experience.
- Supported website updates, issue resolution, and ongoing performance improvements.
